ERROR ddjvu: Cannot decode page 15.

Due to the fact that at least one of the pages in the original djvu file was damaged (page 15) - which does not prevent the user from working with the file normally within DJVU Reader - neither the internal Internet Archive converter nor the other converters I used were able to convert the original djvu file of the 13th volume of The Dimitrakos Dictionary into either pdf format or a series of jpg files.

So, the only way to get it is to download the original djvu file either from the list on the right side of Internet Arhive page, or as part of a rar archive with a complete selection of all 15 volumes in djvu format.

Internet Archive page:
